

## ELOMOBILE AND GARMIN ANNOUNCE THEIR PARTNERSHIP AND THE FINALIZATION OF THE INTEGRATION BETWEEN THEIR PRODUCTS TO OPTIMIZE THE MANAGEMENT OF FLEETS OF VEHICLES FOR PROFESSIONALS

**Brest, March 18th 2011** : ELOmobile, leader in fleet management solutions and GARMIN world leader in GPS, announce to have finalized their partnership and the integration of their technologies to optimize the fleet management system. ELOmobile successfully integrated the protocol owner *Garmin Fleet Management Interfaces Control*® which allows a communication between the ELOmobile computers of the ELOcom range and the GPS GARMIN products such as GPS 4' 3 Nuvi 465T™ and GPS 5'Dezl™ 560LT (recently presented to the THESE 2011 in Las Vegas in January). Especially conceived for the trucks, with a robust design, these 2 models of GPS are equipped with a extra-broad touch screen and a powerful loudspeaker, ideal for an environment in cabin. Thus the users of the integrated solution can profit from all of the advantages offered by GPS GARMIN : the road map is worked out for the preloaded trucks, assistant of lanes with realistic posting of the road panels on Dezl™ 560LT, service of information-traffic, etc. Through the intelligent ELOmobile computers, the users of the integrated solution profit from a complete social management of the driver based on the chronotachygraphes data (digital and analogical) and from a deepened ecodriving, based on the technical data of the engines, via the vehicle BUS CAN. Finally the integration of the protocol offers a real time transport between drivers of the vehicles and the operating staff for a simple and convivial communication.

“We were allured by the width of the GPS range of GARMIN which makes possible to meet the specific needs of some of our customers of the transport and logistics industry. Thus, the integration of the GARMIN protocol enables us to offer an instantaneous compatibility between our embedded computers and about thirty GPS GARMIN products for a range of active price from 99€ to 499€, which is unique. It is once again the demonstration of our will to offer more choice, more flexibility and more opening to satisfy our customers” declares **Frederic SERRE, ELOmobile Chief Executive Officer**.

**Michael GRANDON-CLOUET, Sales Director of the automobile department GARMIN** adds : “We were pleasurably surprised by the speed and the effectiveness of the integration with ELOmobile. We are certain that together, we are able to offer innovating solutions of quality to fulfill the requirements of the fleet management”.

A demonstration of the ELOcom LISTO and Garmin Nuvi 465T™ solution will be available during the SITL tradeshow of 2011 to Paris (29-30- March 31st) on both **ELOmobile (N06)** and **GARMIN (Q16)** booth.

**About ELOmobile - Vehco Group:** Since March 2011, ELOmobile and Vehco, the two independent leaders of France and Northern Europe, specialized in fleet management solutions are linked to create a European leader, and to bring the broadest offer of products and services of the market.

ELOmobile is the French leader of the logistics and transport fleet management solutions. Created in 1999 within the Technopolis of Brest to decode the tachographs on real time and to allow a complete social management of the truck drivers, ELOmobile became the specialist in the integrated solutions, opened and flexible for the optimization of the fleets of professional vehicles.

Since its creation in 2001 in Gothenburg in Sweden, Vehco has developed innovating solutions to improve the productivity of the drivers of trucks and buses: ecodriving solutions and simple ergonomics on mobile terminals such as PDA.

The strategic combination of the two entities represents a manpower of approximately 100 people with 6 establishments in Europe (Germany, Denmark, Spain, France, Norway and Sweden), and 800 customers divided in 11 European countries, that is to say more than 30,000 embedded computers which equip trucks, buses and commercial vehicles.

The group offers a service of first order to the transport and industry domains: geolocation and optimization of fleet, social management, ecodriving, management of the orders of transport and rounds, follow-up of the temperatures, follow-up of the trailers, safety of the men, the vehicles and the goods.
